

PATIENT & GUEST SEATING.

MEDICAL GRADE PROTECTION IS POSSIBLE.

healthHcentric seating is more than just a chair. What's really critical for healthcare seating is durability and cleanability, which are at the heart of our design and patented IC+* seating upholstery. IC+ provides a PVC-free and latex free alternative. Our patient and guest seating is designed in accordance with Infection Control guidelines. That means we don't use ANY wood materials since they're porous and not suitable to prevent the spread of infection. With our IC+ coating system, unique clip system and seamless sealed seats: the perfect seating for the healthcare environment is here. Add durability, exceptionally cushioned support, contemporary style and a wide range of models and sizes to make them a perfect fit. healthHcentric seats are ideal for patient rooms, examination areas and treatment spaces. Used as an interlocking modular seating system or stand-alone chair, this seating provides family and friends with the safety and support needed to help maintain a healing environment.

*IC+ patent pending.

healthHcentric
medical grade seating

Introducing tough, made tougher. IC+* has been specially formulated to provide a highly durable, cleanable and bed bug proof seating upholstery for today's healthcare industry. Pathogens and fluids stay out because IC+ is non-porous, seamless and forms a completely sealed barrier (including the underside of the seat pan). This breakthrough coating also prevents bed bug infestations in the upholstered components of all healthcentric seating.

IC+ also takes a beating. It is tough against high traffic abuse that furniture takes in today's healthcare facilities. IC+ offers an abrasion rating of 1,000,000 double rubs. It is PVC-free, latex free and is guaranteed not to crack, puncture or tear for 10 years. It also stands up to all hospital grade cleaners and disinfectants – including Rescue, bleach, Cavicide, Wex-Cide and Virox 5 – allowing cleaning staff to efficiently and effectively remove pathogens from the surface of our chairs.

All this, while still looking good and functioning even better.

- + SUPERIOR PUNCTURE AND TEAR RESISTANCE
- + NON-POROUS
- + GUARANTEED NOT TO CRACK
- + PVC-FREE
- + ANTI-SLIP PROTECTION
- + SUPERIOR CLEANABILITY & CLEANING AGENT TOUGH

ON ANY healthcentric CHAIR

“IF YOU CAN’T CLEAN IT, DON’T BUY IT!”*

HOW DO YOU HELP **STOP** THE SPREAD OF INFECTION.

- No seams
- Completely sealed seats
- Clip system to easily remove & clean under seats
- No exposed wood

CLIP SYSTEMS. WE INVENTED THEM BECAUSE YOU NEED THEM.

Along with durability, cleanability is important when it comes to healthcare seating. That's why we invented a unique clip system for the seat pans of our chairs. Our clips are covered with our tough IC+ coating. This provides a snug, secure fit eliminating any scratching or scraping and ensures there are no surface catch points for a thorough cleaning. Using the clip system, our chair seats can be easily removed, to be completely cleaned, including the bottom of the seat pan. This also makes it faster and easier to assemble and reconfigure chairs to suit different space requirements. The clips allow the seat pan to be easily and securely clipped back in place. So simple, yet so much more advanced than other removable seat systems. It's hard to believe it didn't exist until we invented it.

The Aloe seating clip system can be disengaged with no tool required, so healthcare areas can be thoroughly cleaned quickly and efficiently.

PATIENT SEATING. MODULAR TO SUPPORT ALL SHAPES & SIZES.

Steel frames. Varied sizes for different sized patients. Optional features.
All this ensures long-term durability for the most demanding environments.

- Multiple patient seating configurations available
 - The patient clip system allows the seat to be easily removed for cleaning without the use of tools
 - 3 seat sizes – 21", 24" and 30" – and 2 back heights
 - Support all body shapes and sizes
 - Seats, backs and arms are easily replaced in field
 - Seat bottoms are completely sealed, allowing for simple wipe down cleaning to prevent spread of infections
 - Seat, back and arm covers are available for additional cleaning capabilities and wear protection
 - Patented adjustable headrest option offers three pivot points with seven inch vertical and horizontal adjustments to provide maximum head and neck support
 - Torsion Spring Motion back option improves comfort for longer-term sitting requirements, and better supports patients in getting out of the chair
 - Closed arm option offers a pleasing aesthetic and additional comfort
 - Standard wall saver frame is available with two rear casters for ease of portability
 - Patient bariatric seating with a 750 lb. weight capacity is also available
 - Aloe can be modified to fit specific requirements including seat and back thickness and shape
-

External bracket option allows for completely sealed backrest when coated with IC+.

CONFIGURABILITY. ROOM SHAPES ARE DIFFERENT. YOUR CHAIRS SHOULD BE TOO.

A hospital. A clinic. A private care facility. They all have completely varied room sizes and shapes. The healthCentric line will allow you to create the configuration you need. This allows for endless seating possibilities with as many as six different table sizes and shapes. Now you can maximize your space, whatever shape you need. And we can help you design the configuration that suits your needs perfectly.

Interlocking capabilities and modular designs offer flexible solutions for the ever-changing demands of a 24/7 environment. In field replacements include seats, backs, arms, frames and casters. Get extended life, reduced waste and cost effectiveness.

- Multiple patient seating configurations available
- 3 seat sizes – 21", 24" & 30" and 2 back heights
- Seat, back and arms covers available for additional cleaning ease and protection
- Can be modified to fit specific needs including seat and back thickness and shape
- Wall saver frames are standard

BARIATRIC SEATING.

WE CAN HELP WITH THE HEAVY LIFTING.

Larger patients can be a real challenge. When patient weight or size is an issue you can rely on our line of bariatric models. Bariatric models are warranted for a 750 lb. active weight capacity, ensuring that they can handle carrying the heavier weight over time.

ORTHOPEDIC SEATING.

YOUR CHAIR SHOULD HELP YOU HEAL.

Hospital acquired infections (HAIs) are specifically challenging for healing patients. Our hip chairs offer the assurance of medical grade protection for those requiring post orthopedic surgery support. A larger footprint ensures maximum stability while providing a higher seat for ease of mobility.

FAST DELIVERY:

Whether your order is for a single chair or multiple seating products, our order process system ensures your high-quality products are delivered on time.

With a large selection of in-stock optional components, ergoCentric offers fast turnaround times to accommodate your business needs. Regular orders are processed and shipped within **10 business days**. As well, every effort is made to fill special orders within our regular ship times.

*IC+ 10 YEAR WARRANTY:

Specifically formulated for the Healthcare Industry, IC+ is the only upholstery option available that is warranted against tears, cracking and punctures.

IC+ is warranted against tears, cracking and punctures for 10 years.
