

INTRODUCING A NEW KIND OF MEDICAL GRADE SEATING.

Introducing healthCentric. A line of seating created with the needs of the healthcare industry in mind. For the last 20 years ergoCentric has been providing seating to hospitals, long-term care and assisted care living facilities. Now we've collected all this knowledge and distilled it into our latest line: healthCentric.

HEALTH

MADE TOUGHHER.

[Introducing tougher.](#) We wanted to create the ideal seating for the healthcare environment, so we've considered every detail. Working closely with ergonomists, infection control practitioners, specifiers and caregivers, we've refined our seating designs. They're modular, seamless and built tough and using the patent pending IC+* made them even tougher. We've continued with our non-obsolescence policy of providing adaptable, repairable and customizable seating that is backed with our 10-year warranty. healthHcentric seating is ideal for patient rooms, waiting areas, nursing stations, laboratories, examination rooms, operating rooms and even administrative and office areas. With the healthHcentric line, we're here to provide medical grade seating that's right for you and your needs.

IMPENETRABLE

DESIGN

Design made tougher. Our seating is made to leave a good first impression, especially when it comes to meeting your healthcare needs. That's why our designers were excited about creating seating specifically suited to the varied and demanding needs of the healthcare industry. Your waiting rooms, reception areas and treatment facilities need to be functional while being inviting. But our passion for design doesn't stop there. In the medical arena, seating design also means no crevices or holes. Our seats made with IC+ have no seams and are sealed underneath. IC+ is even less porous than vinyl. Our optional clip system allows you to remove the seat for easy and complete cleaning. Functionality plus durability is what our design philosophy for healthHcentric is all about.

*IC+ patent pending.

PUNCTURE PROOF

VALUE

Value made tougher. Durable seats equal cost savings. Great value is very important to healthcare providers. That's why we created healthHcentric with the needs of the healthcare industry in mind. Our IC+* is a PVC-free alternative to vinyl and is five to ten times stronger than vinyl in puncture, tear and burst tests. IC+ is so tough we guarantee it will not crack, puncture or tear for ten years. And it stands up to all cleaners and disinfectants. This translates into cost savings, landfill savings and life savings.

*IC+ patent pending.

INFECTION CONTROL+

medical grade protection

Introducing a coating specifically formulated for the healthcare industry. IC+* is virtually impenetrable. It's a highly durable and impermeable upholstery solution that's PVC-free and warranted up to 10 years against cracking, punctures and tears. This breakthrough coating helps prevent the spread of infectious disease by being non-porous and easily disinfected. Leaks and drips and fluids stay out and can easily be cleaned up. The impermeable structure forms a seamless moisture-proof barrier making it anti-bacterial, anti-fungal and stain resistant – perfect for specialized needs.

IC+ also takes a beating. It doesn't hurt that it's tough against wear, tears, punctures and the general high traffic abuse that furniture takes in most healthcare facilities. All this, while still looking good and functioning even better.

- + SUPERIOR PUNCTURE AND TEAR RESISTANCE
- + NON-POROUS
- + GUARANTEED NOT TO CRACK
- + PVC-FREE
- + SUPERIOR CLEANABILITY & CLEANING AGENT TOUGH
- + SUPERIOR ERGONOMIC COMFORT
- + 10 YEAR WARRANTY
- + NO OFF-GASSING
- + GREENGUARD® CERTIFIED WHEN UPHOLSTERED
ON ANY healthHcentric CHAIR

*IC+ patent pending.

COMPLETELY SEALED. SUPERIOR CLEANABILITY.

The underside of the seat pan and the entire seat surface are sealed with a seamless moisture-proof barrier against all liquids and cleaning agents. That means superior infection control against fungus, microbes, bacteria and stains.

Removable seats make for easy cleaning.

healthHcentric with IC+ is impermeable to liquids and microbes.

healthHcentric with IC+ completely seals the seat and underneath the seat pan, leaving no seams ensuring pathogens and moisture are kept out.

healthHcentric patient and guest seating with IC+ has a clean out design feature between the backrest and seat to provide easy, thorough cleaning without compromising comfort.

Removing the seats means the seat pan can be cleaned with ease. Simply unhook the clips on patient and guest seating and the seat pan can be cleaned. It's quick. It's simple. Now the entire seat can be cleaned, including the underside of the seat pan and the support bars. Then snap it back and secure for immediate use.
